PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

NOV 25 1996

In re PATENT APPLICATION of)	Group Art Unit: 1211
)	
Chris Buhr et al)	Docket No. 157
)	
Serial No: 07/652,978)	Examiner: G. Kunz
)	
Filed: February 8, 1991)	
)	
Title: METHYLENE PHOSPHONATE)	
OLIGONUCLEOTIDE ANALOGS AND)	
NUCLEOSIDES)	

DECLARATION

The Assistant Commissioner
for Patents
Washington, D.C. 20231

Dear Sir:

I, Norbert Bischofberger, declare as follows:

1. I have been engaged in or directed the synthesis and chemistry of oligonucleotides, nucleotides and nucleosides for over ten years. I attach a copy of my Curriculum Vitae.
2. I am a coinventor of the above-referenced application.

3. I have read and believe I understand the Office Action Mailed August 7, 1996, in particular the rejection under 35 U.S.C. § 112, first paragraph.

4. I believe, more likely than not, that when we filed the application, it would have been obvious to one of ordinary skill in the art that, for claimed species where R^2 was phenyl, alkyl (1-12C) or hydrogentriethylammonium ion, such species were salts or synthetic intermediates useful to prepare the active compounds where R^2 is hydrogen. The amended claims recite compounds that are useful as salts of the biologically active compounds or as synthetic intermediates for preparing them. We prepared the biologically active compounds using diester intermediates as described in the working examples. We gave a general description of the synthetic method in Buhr et al. (*Collect. Czech. Chem. Commun.* 58:102-104 1993, of record, "Buhr"). Workers had described similar methods to prepare phosphonate nucleotide analogs where the synthesis procedure generated a diester phosphonate moiety as an intermediate (see, e.g., Jones and Moffatt, *J. Am. Chem. Soc.* 90:5337-5338, 1968, of record). Thus, it would have been obvious to one of ordinary skill in the art when we filed the application, that one would have converted the diesters to their corresponding diacids or salts to obtain biologically active nucleotide analogs.

5. I declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

Date 10-24-1996
Gilead Sciences, Inc.
353 Lakeside Drive
Foster City, CA 94404

Norbert Bischofberger
Norbert Bischofberger

NORBERT BISCHOFBERGER, Ph.D.

TITLE	Vice-President of Research Gilead Sciences, Foster City, CA
RESPONSIBILITIES	Research Management, Coordination of Preclinical Development for Novel Drug Candidates, Investigation and Coordination of External Animal Model Studies, Facilitation of Library Organization and Management.
EDUCATION	Ph.D., Organic Chemistry at the Eidgenossische 1983 Technische Hochschule (ETH), Zurich, Switzerland B.S., Chemistry, University of Innsbruck, Austria 1979
EXPERIENCE	
1995 to Present	Vice-President of Research Gilead Sciences, Foster City, CA
1993 to 1995	Vice-President of Organic Chemistry Gilead Sciences, Foster City, CA
1990 to 1993	Director of Organic Chemistry Gilead Sciences, Foster City, CA
1988 to 1990	Manager of DNA Synthesis Genentech, Inc., South San Francisco, CA
1986 to 1988	Scientist, Chemistry Group, Molecular Biology Department Genentech, Inc., South San Francisco, CA
1984 to 1986	Harvard University, Postdoctoral Fellow Chemistry Department, Professor Whitesides Laboratory
1983 to 1984	Postdoctoral Fellow, Institute of Organic Chemistry Syntex, Inc.
